

Image prompt pack

Thirty-four ready-to-run prompts covering every image position on the Nevoxel site that can legitimately be generated. Each prompt is **self-contained** – it carries its own subject, composition constraint, style block and ban list – so they can be pasted into a batch queue in any order without shared context.

Prompts

34Derived by
cropping**5**Must be
photographed**6**Need
permission**7**Site routes
covered**44**

How to use this pack

1. Each numbered block is one complete prompt. Copy the grey block verbatim – do not trim the trailing style sentences, they are what keep the set looking commissioned rather than assembled.
2. Set the aspect ratio from the tag beside each number. Where your model has no matching ratio, generate the nearest wider option and crop – never stretch.
3. Deliver at the stated minimum resolution or larger. Filenames and destination paths are given so images can be dropped straight into the repo.
4. Generate batch by batch. Images within a batch must look like one shoot; across batches, consistency matters less.

Six images in the register are not in this pack

Three team portraits and three office photographs must be taken with a camera. They depict three named, identifiable individuals and three real Nevoxel premises in Mumbai, Noida and Lucknow. A generated face published under a real person's name, or a generated building presented as a real office, is a misrepresentation – not a placeholder. **Seven client logos** are also excluded: those need each company's written permission and their own artwork, never a traced or generated imitation. See the last page.

Global constraints — already embedded in every prompt below

- No text, lettering, signage, watermarks or numbers in frame
- No CGI, 3D renders or illustration – photographic only
- No orange tint, duotone or colour filtering of any kind
- No bow-on container ship at sunset
- No handshakes with a port in the background
- No globes, route maps or data-graphic overlays
- Natural film grain retained; no heavy retouching
- Documentary realism, never advertising gloss

Batch 1 — Home hero slides

2 PROMPTS · 16:9 · 2560×1440

The home hero is a three-slide carousel cross-fading every 6.5 seconds. Slide 1 (maritime) already exists, so these two must match its register. **Composition is critical:** a navy scrim runs left-to-right at 94%→22% opacity and the headline sits in the left third. The hero crops to roughly 3.4:1 on a wide viewport — the top and bottom sixth get cut.

01 Logistics slide 16:9

src/assets/img/hero/logistics.jpg

A real inland freight and container yard at early morning, photographed from an elevated three-quarter viewpoint. Stacked shipping containers in muted industrial reds, blues and greys recede toward a rail-mounted gantry crane positioned right of centre, with one container suspended mid-lift. Open pale overcast sky fills the entire left third of the frame, which must stay visually quiet and uncluttered because headline text is overlaid there. Wet tarmac in the foreground holds soft grey reflections. Cool blue-grey palette, restrained and documentary. Keep all important detail within the middle horizontal band — the top sixth and bottom sixth of the frame will be cropped away. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural overcast daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

ALT TEXT Rail-mounted gantry crane lifting a container at an inland freight terminal

02 Legal slide 16:9

src/assets/img/hero/legal.jpg

The interior of a quiet modern maritime law office at dusk, wide view. Floor-to-ceiling windows along the right side look out over a working port, with gantry cranes and a berthed vessel visible in soft focus beyond the glass. Right of centre stands a dark timber meeting table carrying closed document folders and a single desk lamp casting one warm pool of light. The entire left third of the frame is plain shadowed wall and empty floor, kept visually quiet because headline text is overlaid there. Deep navy and charcoal interior tones. The room is empty of people. Serious and restrained, not corporate stock photography. Keep all important detail within the middle horizontal band — the top sixth and bottom sixth of the frame will be cropped away. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, available light at blue hour, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

ALT TEXT Meeting room overlooking a container terminal at dusk

Batch 2 — Practice desk asides

3 PROMPTS · 3:2 · 1440×960

These sit beside the headline on the three desk pages, replacing white line drawings. No text overlays them, so the whole frame is usable. All three must share one light and one distance — they are seen as a set by anyone browsing the desks.

03 Maritime desk 3:2

src/assets/img/desk/maritime.jpg

A marine superintendent in full PPE standing on the deck of a working merchant vessel during a port call, mid-inspection, holding a clipboard or rugged tablet. Hard hat, high-visibility vest, work boots, weathered deck plating and pipework around them. Bright natural daylight, candid rather than posed, the subject looking at their work and not at the camera. Real working conditions, slightly worn equipment. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters. No handshakes, no posed corporate groupings.

ALT TEXT Marine superintendent inspecting deck equipment during a port call

The interior of a busy freight-forwarding warehouse mid-shift. Tall steel racking runs into the depth of the frame, a forklift moves through the middle distance carrying a pallet, and a worker in a high-visibility vest checks a manifest on a handheld scanner in the foreground. Practical overhead industrial lighting mixed with daylight from a loading door. Genuinely in use – pallets part-loaded, floor markings scuffed, not a clean empty showroom warehouse. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, mixed available light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

ALT TEXT Freight forwarding warehouse with racking and a forklift in motion

A close overhead view of a charterparty contract and shipping documents spread across a dark timber desk, with a hand holding a pen mid-annotation in the margin. Shallow depth of field, the paper texture and the pen tip sharp, the far edge of the desk falling out of focus. Warm directional window light from the left. A pair of reading glasses and a plain notebook sit at the edge of frame. Commercial and procedural in feeling, not judicial – absolutely no gavels, no scales of justice, no law library bookshelves. Ultra-photorealistic editorial photograph, full-frame camera, 50mm macro, natural window light, natural film grain. No readable text, lettering, signage, watermarks, numbers or data overlays anywhere in the image – documents must read as paper texture only. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

ALT TEXT Charterparty documents being annotated at a desk

Batch 3 — Dual-path doors

2 PROMPTS · 16:9 · 1600×900

The two most important clicks on the home page, presented as a fixed pair. They **must be a matched pair** – same light, same distance, same treatment. If one is warmer or tighter than the other, the page reads as favouring that door. Both carry heading and body text low in the card, so keep the lower third quiet.

A ship's officer at work on the deck of a merchant vessel at sea, wearing a boiler suit and hard hat, checking equipment at a winch or mooring station. Open ocean and a real weather sky behind them. Mid-task and candid, not looking at the camera. Natural daylight with visible sea spray and genuine wear on the deck plating. Keep the lower third of the frame visually calm and free of detail, because text is overlaid there. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

ALT TEXT Ship's officer working at a mooring station at sea

A shore-side ship management office with a working port visible through a large window behind the desks. Two colleagues in business dress work at a shared monitor in the middle distance, genuinely occupied rather than posed. Cranes and stacked containers read softly through the glass. Natural daylight from the window, ordinary office texture – papers, mugs, a whiteboard at the edge of frame. Keep the lower third of the frame visually calm and free of detail, because text is overlaid there. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters. No handshakes.

ALT TEXT Ship management office overlooking a container terminal

Batch 4 — Landing page asides

7 PROMPTS · 3:2 · 1440×960

These fill a slot the page template already accepts and never uses. No code change is needed — the hero component renders an aside when one is passed.

08 Expertise overview

3:2

img/aside/expertise.jpg

A working port photographed from a raised vantage point where three modes of transport are visible in one frame: a berthed merchant vessel on the left, container handling equipment in the middle, and a road or rail corridor running inland on the right. Mid-morning daylight, clear working conditions, a genuine operating terminal rather than an aerial showpiece. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

09 For employers

3:2

img/aside/employers.jpg

Three colleagues in business dress around a table in a real office, mid-discussion over printed documents and a laptop. One is speaking, the others listening. Natural daylight from a window to one side. Ordinary working textures — coffee cups, notebooks, a slightly untidy table. Candid and unposed. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters. No handshakes, no boardroom stock posing.

10 For candidates

3:2

img/aside/candidates.jpg

A merchant navy officer in shore business dress standing outside a port administration building, holding a document folder, caught in a natural moment between arriving and going in. Port infrastructure soft in the background. Morning daylight. The subject reads as someone with sea experience moving into an office world — composed, slightly out of their usual setting. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

11 About

3:2

img/aside/about.jpg

A wide view of a working Indian harbour waterfront in the early morning, with small craft, jetties and mid-rise commercial buildings behind. Warm early light, haze on the water, ordinary working activity rather than a tourist view. Grounded and specific to a coastal Indian city. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural morning light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

12 Job board

3:2

img/aside/jobs.jpg

The interior of a crewing and manning office, with two people in conversation across a desk and a wall of pigeonholes or document files behind them. Ordinary fluorescent and daylight mix, busy and slightly cluttered, genuinely administrative. Candid, mid-conversation, neither person looking at the camera. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, mixed available light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

13 Contact

3:2

img/aside/contact.jpg

A close, warm view of a working desk in a small professional office – a desk phone in use with a hand resting on the receiver, a notepad with a pen, a monitor edge out of focus behind. Natural window light from the left, shallow depth of field. Human and specific rather than a generic call-centre image. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, natural window light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters. No headset call-centre imagery.

14 Insights /blog

3:2

img/aside/blog.jpg

An overhead view of a working desk carrying printed market reports, a notebook with handwritten notes, a pen and a cup of tea, with a laptop edge entering the frame. Papers overlapping naturally as if genuinely in use. Warm directional window light, shallow depth of field on the far edge. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, natural window light, natural film grain. No readable text, lettering, signage, watermarks, numbers or data overlays anywhere in the image – paper must read as texture only. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

Batch 5 — Service and programme asides

5 PROMPTS • 3:2 • 1440×960

These five double as the service card images (slot S1) at a tighter 3:2 crop, so no separate generation is needed for the cards – crop these to 900×600.

15 Maritime shore recruitment

3:2

img/service/maritime-recruitment.jpg

A job interview in progress in a modest meeting room – two interviewers on one side of a table, one candidate opposite, printed CVs on the table between them. Natural daylight from a window. Attentive and businesslike, mid-conversation, nobody looking at the camera. An ordinary real room, not a glass-walled corporate showpiece. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters. No handshakes.

16 Executive search

3:2

img/service/executive-search.jpg

Two senior professionals in quiet conversation in a private meeting room, seen partly through a half-open door or from across the room at a respectful distance. Low warm interior lighting, city visible through a window behind them. The framing itself should feel discreet and unobtrusive – this is a confidential process and the photograph should convey that through distance and restraint. Faces not clearly readable. Ultra-photorealistic editorial photograph, full-frame camera, 85mm lens, available interior light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

17 HR advisory (NECD)

3:2

img/service/hr-advisory.jpg

A small training or briefing session in progress – six to eight people seated informally in a semicircle while one person stands and speaks, gesturing toward a flip chart. A real training room with ordinary chairs, daylight from side windows. Engaged and candid, participants looking at the speaker. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No readable text, lettering, signage, watermarks, numbers or data overlays anywhere in the image – the flip chart must be blank or illegible. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

18 Sea2Shore

3:2

img/service/sea2shore.jpg

A merchant navy officer with a kit bag over one shoulder walking down a vessel's gangway onto a quayside, shot from the quay looking up. The ship's hull fills the upper right of the frame; the quay and bollards occupy the lower left. Overcast morning light. Read as a departure from sea rather than a boarding – the officer is coming down and away. Candid, face partly turned. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural overcast light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image, including on the hull. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

19 Resume help & coaching

3:2

img/service/resume-coaching.jpg

Two people side by side at a laptop reviewing a printed document together, shot slightly over the shoulder of the coach so the candidate's face is visible and engaged. One hand points at a line on the paper. A small office or meeting table, natural daylight, a coffee cup nearby. Collaborative and warm rather than instructional. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, natural daylight, natural film grain. No readable text, lettering, signage, watermarks, numbers or data overlays anywhere in the image – the document must read as paper texture only. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

Batch 6 — Article covers

5 PROMPTS • 16:9 • 1600×900

One per published article. Each appears at 387 px wide in the index grid, so keep compositions simple and avoid fine detail that disappears at small size. The lead article is shown at a 21:9 crop of the same file, so leave headroom top and bottom.

20 How to read a sea CV

16:9

img/post/reading-a-sea-cv.jpg

A flat overhead view of a printed curriculum vitae lying on a plain desk beside an official-looking certificate document and a pair of reading glasses. Even, soft daylight from above. Simple and graphic, strong negative space around the papers, shallow shadow. Restrained and quiet. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, soft natural daylight, natural film grain. No readable text, lettering, signage, watermarks, numbers or data overlays anywhere in the image – all documents must read as paper texture only. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

21 The first year ashore

16:9

[img/post/first-year-ashore.jpg](#)

A single person seated at a desk in a large open-plan office, photographed from a distance so they appear small within the space, with empty desks around them and a window casting long light across the floor. Quiet and slightly isolating in feeling without being bleak – the article is about disorientation, not despair. Muted natural tones. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

22 Shore hiring market 2026

16:9

[img/post/shore-hiring-market-2026.jpg](#)

A wide establishing view of a large container terminal at scale – multiple gantry cranes in a receding line, container stacks, a vessel alongside in the distance. Flat even daylight, no people visible. Calm, factual and enormous, conveying an industry rather than a moment. This is the one image in the set where a big establishing shot is correct. Ultra-photorealistic editorial photograph, full-frame camera, 70mm lens compressing the crane line, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters. Not shot at sunset.

23 Women in maritime shore roles

16:9

[img/post/women-in-maritime-shore-roles.jpg](#)

A woman in full PPE – hard hat, high-visibility vest, safety glasses – working at a port or terminal site, checking equipment or reviewing something on a tablet. Candid and mid-task, absolutely not posed to camera and not smiling at the viewer. Competent and ordinary. Bright natural daylight, real working environment with genuine wear and texture. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, natural daylight, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

24 Confidential search explained

16:9

[img/post/confidential-search-explained.jpg](#)

A plain closed meeting-room door in an office corridor, photographed straight on from a few metres back, with a sliver of frosted glass beside it and diffuse daylight in the corridor. Completely empty of people. Restrained, still and slightly formal – discretion is the subject, so the image should withhold rather than reveal. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural diffuse daylight, natural film grain. No text, lettering, signage, room numbers, watermarks or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

Batch 7 — Job page sector keys

3 PROMPTS • 4:3 • 800×600

Sixteen job pages share one template and pick an image by sector. These sit beside the apply button and **must not compete with it** — quiet, low-contrast texture, not statement photographs.

25 Maritime key 4:3

img/sector/maritime.jpg

A tight abstract detail of a merchant vessel's hull — riveted or welded steel plating with weathered paint, a mooring line or fairlead entering one corner of the frame. Flat overcast light, low contrast, muted blue-grey and rust tones kept deliberately desaturated. Quiet and textural, reading almost as a surface study rather than a subject. Ultra-photorealistic editorial photograph, full-frame camera, 85mm lens, flat overcast light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

26 Logistics key 4:3

img/sector/logistics.jpg

A tight abstract detail of stacked shipping containers photographed straight on, reading as a flat grid of weathered corrugated panels in muted blues, greys and faded reds. Flat overcast light, low contrast, deliberately desaturated. Quiet and textural, almost a pattern study. Ultra-photorealistic editorial photograph, full-frame camera, 85mm lens, flat overcast light, natural film grain. No text, lettering, container markings, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

27 Legal key 4:3

img/sector/legal.jpg

A tight abstract detail of the edge of a stack of document folders on a dark desk, shallow depth of field, only the paper edges and a corner of a binder clip in focus. Soft directional light, low contrast, muted neutral tones. Quiet and textural, no subject matter readable. Ultra-photorealistic editorial photograph, full-frame camera, 85mm macro, soft window light, natural film grain. No readable text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

Batch 8 — Atmosphere and utility

6 PROMPTS • 21:9 AND 4:3

The lowest-priority group. Harbour targets a colour proportion of white/mist 60%, navy 33%, orange 7% — full-bleed photography eats that budget, so use these sparingly. Generate them last, and only if the earlier batches have landed well.

28 Section break — waterline 21:9

img/break/waterline.jpg

An extremely wide horizontal view of a ship's hull at the waterline, the painted boot-topping line running horizontally across the entire frame with calm dark water below. Near-abstract, minimal, flat overcast light. Muted navy and steel tones. Almost a graphic band rather than a photograph of a vessel. Ultra-photorealistic editorial photograph, full-frame camera, 85mm lens, flat overcast light, natural film grain. No text, lettering, draught marks, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

29 Section break — mooring lines

21:9

img/break/mooring.jpg

An extremely wide horizontal view of heavy mooring ropes running from a quayside bollard out of frame, photographed low and close on wet concrete. Diagonal rope lines against a flat horizontal quay edge. Overcast light, muted greys and rope-fibre browns kept desaturated. Near-abstract and quiet. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, flat overcast light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

30 Section break — container pattern

21:9

img/break/containers.jpg

An extremely wide horizontal view of a container stack photographed straight on so it reads as a repeating grid of rectangles filling the entire frame edge to edge. Muted blues, greys and faded reds, flat overcast light, low contrast, deliberately desaturated. Pure pattern. Ultra-photorealistic editorial photograph, full-frame camera, 135mm lens flattening the stack, flat overcast light, natural film grain. No text, lettering, container markings, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

31 Section break — empty berth

21:9

img/break/berth.jpg

An extremely wide horizontal view of an empty quayside berth at first light – bollards and fenders along the quay edge, still water, no vessel present, no people. Cool blue pre-dawn light, mist on the water, very low contrast. Calm and entirely still. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural pre-dawn light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

32 404 page background

21:9

img/util/404.jpg

An extremely wide horizontal view of open grey sea meeting an overcast horizon, entirely empty – no vessel, no land, no birds. Flat diffuse light, very low contrast, muted blue-grey throughout. Quiet and slightly featureless by intention, with the horizon sitting low in the frame. Carries heading and body text, so keep the whole frame calm and even. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, flat overcast light, natural film grain. No text, lettering, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

33 Empty state

4:3

img/util/empty.jpg

A quiet still life of an empty noticeboard or a bare pinboard on a plain office wall, with a few unused pins in one corner. Soft even daylight, muted neutral tones, generous empty space. Calm and matter-of-fact rather than sad. Ultra-photorealistic editorial photograph, full-frame camera, 50mm lens, soft natural daylight, natural film grain. No text, lettering, notices, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

Batch 9 — Social share image

1 PROMPT · 1.91:1 · 1200×630

Highest return of anything in the pack: one file repairs the link preview for all 44 routes. The Nevoxel logo is composited on afterwards — do not attempt to generate it.

34

Default og:image base plate

1.91:1

img/social/og-default.jpg

A merchant vessel alongside at a working berth photographed from the quay, with the accommodation block and bridge visible right of centre and calm harbour water on the left. Late afternoon daylight, not sunset. The left half of the frame must stay visually quiet and simple, because a logo is composited there afterwards. Keep the composition centred and safe — the outer margins of this image will be cropped unpredictably by different platforms, so nothing important may sit within roughly five percent of any edge. Ultra-photorealistic editorial photograph, full-frame camera, 35mm lens, natural daylight, natural film grain. No text, lettering, vessel names, signage, watermarks, numbers or data overlays anywhere in the image. No CGI, no 3D render, no illustration. No orange tint, no duotone, no filters.

AFTER GENERATION Apply the navy scrim, composite the Nevoxel logo lower-left, export under 300 KB — several platforms refuse to fetch larger files.

What this pack deliberately excludes

Thirteen positions in the register are not generation tasks. Sending them to an image model would produce something that looks right and is not true.

T1 · ×3	Team portraits. Neetu Jaiswal, Rajesh Menon and Adv. Surangama Sharma are named on the page, described in their own biographies and published with <code>schema.org/Person</code> structured data. A generated face under a real person's name is a fabrication, and it would be indexed as that person. <i>Photograph them: neutral wall, eye-level, 4:5, identical crop across all three, model release signed.</i>
01 · ×3	Office photographs. Three real premises — Thane, Noida, Lucknow — presented on a contact page beside their real addresses and phone numbers. A generated building is a false claim about a place a client might visit. <i>Your own staff can shoot these on a phone in an afternoon; that is genuinely enough at 1200×800.</i>
C1 · ×7	Client logos. Mitsui O.S.K. Lines, TORM, Aditya Birla Group, Scorpio Marine, Navig8 Group, ATPi, MTM Ship Management. These are third-party trademarks: each needs the company's written permission <i>and</i> their own vector artwork. Never generate or trace a logo. <i>Until permission arrives, the typeset wordmark already on the site is the correct treatment.</i>
S1 · ×5	Service card images. Not excluded on principle — simply already covered. Crop prompts 15–19 to 3:2 at 900×600 rather than generating again, which also keeps each service consistent between its card and its page.

Derived from the Nevoxel Image Slot Register (Harbour v1.0), which measured all 44 routes against the running build. Slot IDs in this pack match that document. Where a generated image is used, it is a placeholder standing in for commissioned photography — Harbour §14 asks for real working subjects, and generated imagery does not satisfy that for the positions that carry evidential weight.
